# Vectorworks Projector and Hardware Library

VWX has done a pretty good job of putting projectors and cages in their built-in library, but it’s missing a lot of things - mainly new products made after 2018 or so. Yikes !

I have a massive library of projectors and lenses that I’ve collected or made myself over the years. Please hit me up if you’re looking for something - I may have it! Nothing is perfect but it’s pretty damn close enough for jazz.

Epson and Panasonic are particularly good at distributing their 3D CAD. If not on website, ask their sales’ teams. Can’t give out that info here but hit me up and I’m happy to connect you! Also happy to share the 3D models I have.

I also have some select Chief hardware that I’ve made.
