Gimbals

I’ve owned 4 or 5 gimbals since 2017. That’s pretty nuts. I have a DJI RSC2 Pro now. It’s fantastic. The tech has come a long way. Gimbals are like cars: next generations come out constantly with tons of new features. My first gimbal was a Ronin M. I bought it for $1,200. Used it infrequently and practically gave it away for $80 a few years later.

RSC-2 Pro Specific Hot-Tips

Ronin General

Ronin direct connect Bluetooth
Ronin raveneye connect Wifi (pass thru connects to Ronin)

Ronin RavenEye

Camera USB-C plugged into RSC port 1
Raveneye rear plugged into RSC port 3 (wifi logo)
Camera HDMI plugged into Raveneye video
